DETAILED ACTION

Response to Amendment

1. This action is in response to Applicant's reply submitted on 09/14/2010 in reply to Office Action dated 04/14/2010. Applicant's amendment of 04/14/2010 places the Application in condition for allowance.

Status of the Objections or Rejections

2. Due to Applicant's amendment of claims 1, 3 and 4, all rejections from the office Action dated 04/14/2010 are withdrawn. The claims are allowable over the art of record.

Reasons for Allowance

3. Claims 1 and 3-4 are allowable over the art of record. The following is an examiner's statement of reasons for allowance:

The art of record, alone or in combination, fails to disclose "a supply unit for electric power and/or water derived from renewable energies, comprising: a box type profile frame; openable solar panels, forming a box, swivable into a plane of an upper side of the box so a cross-shaped arrangement of the solar panels is formed that may tilt about a horizontal axis on the profile frame; wherein on its top side, as seen from above, a further square, box type frame is arranged, which contains a further solar panel and is connected to one top side of the box type profile frame so that the further solar panel may be swiveled about a horizontal axis; wherein on

Art Unit: 1795

all sides of the square-at-top frame are connected, in a swiveling way, respective peripheral square frames each of same size and each containing a solar panel, so that a cube is formed from the five square frames when the five square frames are swiveled downwards, and that the peripherally connected square frames may be swiveled in the plane of the central square frame and can be locked against the central square frame in the swiveled condition; wherein the central square frame may be locked in each of its swiveled positions, and further, an openable vertical pole is arranged, on which a wind mill with blades, generator, and wind tail elements may be mounted and which may be similarly accommodated in the inside space of the box type profile frame; and wherein various modules, working as interfaces, are built in the inside of the box-type profile frame so that the supply unit offers, in accordance with the varying need, a Choice of at least one of: accumulation of electrical energy from sunlight; accumulation of electrical energy from a separate wind generator; pumping water from stationary, flowing stretch of water or ground water; treatment of drinking water through purification of supplied dirty water; delivery of electric power for different consumers; and direct current generation with hydrogen by means of fuel cells and vice versa hydrogen/oxygen production by splitting water with Direct Current” as recited in the independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
